Filters & Softeners

FEATURES

- Superior one piece body design
- Fewer moving parts than any other comparable valve on the market
- Unique rotary design
- Full 1" valve for unequalled 100 lpm flow rate
- Extra backwashes as required
- Self cleaning brine injector eliminates those annoying injector blockage problems on softeners
- Optional state-of-the-art electronic control

1" PORTS

Electronic (E Suffix)

- Initiates regeneration or backwash based on demand
- Up to 50% salt savings when used as a softener valve

Larger Commercial/Industrial valves also available
